

HURST

HURST FLANGED SYRINGE TRAYING SYSTEMS

HURST patent pending work in progress and storage trays adapt to accommodate a wide size range of flanged syringes. The unique HURST flanged syringe suspension system allows automatic syringe infeed and outfeed. HURST syringe trays feature lock-in-place tray gates and available locking stainless steel lids.

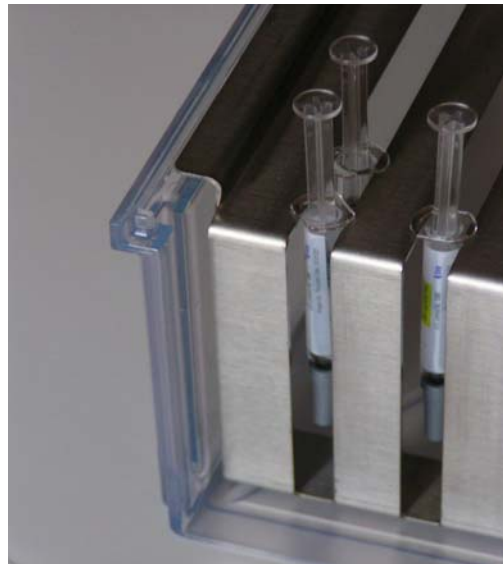

TRAY FEATURES:

- Impact resistant poly-carbonate or autoclavable GE Noryl
- Easy to lift 'wing' sides
- 12" x 18.5" x 4.25" ID standard
- Available in clear or colors
- Empty trays have unlimited stacking capability

SYRINGE INSERT FEATURES:

- Precision CNC laser slots
- Locking lid optional
- All configurations available
- One piece - easy to clean
- 18 gauge #304 standard
- Center support bridge
- Magazine design interfaces with automatic loading and unloading machinery.
