

Locking stainless steel vial tray covers provide maximum protection during vial storage and transport. Locking lids do not interfere with tray stackability.

18 gauge stainless steel inserts are available for syringe suspension magazines. All size slots and custom 'high-hat' locking tray covers are available.

Custom perforations are available to provide aeration for condensate associated with refrigerated products. All hole sizes and patterns available.

Inexpensive plastic dust covers protect vials during storage. Available in clear or opaque. Vial tray dust covers do not interfere with tray stackability.

20 gauge stainless steel inserts provide predictable vial positioning for clinical trials, etc. Dividers are available in any size and pattern.
