

HURST

SAFE SYRINGE & CARTRIDGE TRAY STORAGE & TRANSPORT

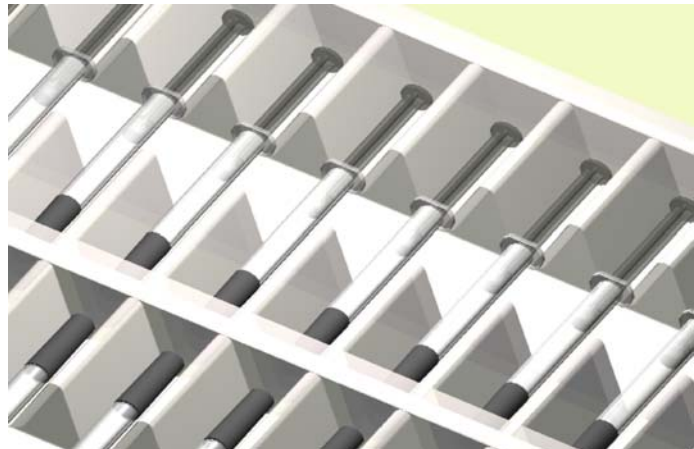

Syringes and cartridges are horizontally stored in special HURST injection molded tray inserts. Both syringe plunger and canular are individually protected, providing a new level of product safety. Inserts may be stacked to provide a maximum of 120 syringes/cartridges per standard large HURST Pharma-tray. HURST new locking stainless steel Pharma-tray lids provide maximum whole tray security.

Molded Syringe Tray Features:

- Size: 11.5" x 18" x 1"
- Unlimited stacking ability
- Choice of clear or colors
- Choice of materials including standard polycarbonate or autoclavable resins

Thirty 1" x 5" universal pockets entrap a wide range of syringe and cartridge products. The cut-away center section of each row provides easy product access. Resilient silicone pads are available to fit over syringes or cartridges for additional product protection during storage or shipping. Resilient silicone pads do not inhibit unlimited stacking capability.

HURST Pharma-trays feature:

- All FDA approved materials
- Std. sizes: 12" x 18.5" x 4.25" & 12" x 18.5" x 2.75" high
- Clear or colors available
- Unlimited tray stacking
- Engineered to interface with automatic packaging machinery
- Two year guarantee
