

**HURST** patent pending vial traying systems adapt to a full range of customer needs by facilitating automatic vial tray loading and unloading, trayed vial positioning for clinical trials, etc., visual identification via color coded and clear vial trays, clear and opaque vial tray lids and tamper evident vial tray security.

**NEW**

### Tray Features:

- High impact FDA approved materials from +325° F. to -60°
- Robust design Interfaces well with automatic equipment
- Choice of colors or clear
- Unlimited stacking capability
- Vial transfer ring for easy vial loading and unloading

### Tray Security Features:

- 20 gauge stainless steel construction
- Product protection during storage and transport
- Tamper evident rear locking attachment to tray
- Does not interfere with tray stacking capability

**NEW**

### Tray Dividers:

- Tray dividers provide exact vial placement
- Custom manufactured hole sizes and configurations
- One piece - easy to clean - FDA approved materials
- Extreme vial protection during handling and shipping

### Tray Lids:

- Clear or opaque for photo-sensitive chemicals
- Economical
- FDA approved materials
- Does not interfere with tray stacking capability
