

HURST

FULL WASHDOWN ACCESS STAINLESS STEEL CARTS

HURST CORPORATION announces a new line of custom designed stainless steel carts developed especially for facilitating washing and sterilization of clean room machinery contact parts. All **HURST** carts feature .125" wall 316L tubular frames with a wide variety of shelving.

Features:

- Fully adjustable/removable rods, shelves and panels.
- Perforate, imperforate and wire mesh shelving is available to meet all requirements.
- Removable stainless steel caster base available.
- Shelves and partitions may be placed on a selectable axis for preferred parts presentation to washing equipment.

Manufacturing:

- Heavy duty stainless steel tubular frames are 100% TIG welded. All welds are hand ground to a #4 finish. Frames feature ultra-fine glass bead finish.
- Spaced 'button' shelf supports are TIG welded in a custom pattern. All welds are 100% electro-passivated.
- All sizes available.
